HOW TO PACK FOR A HIKE

HYDRATION

At a minimum, you need about half a liter of water per mile you plan to hike.

Benefits of water:

- helps you stay alert
- keeps your body cool
- helps avoid fatigue and headaches

MISCELLANEOUS

Some other things you may need:

- bathroom essentials
- hand sanitizer
- layers of clothes
- portable charger
- inhaler
- sunscreen
- bug spray
- cell phone
- flashlight

NUTRITION

Focus on non-perishable, packable, and nutrient dense foods.

Good hiking snacks:

- nuts, trail mix
- dried fruit
- granola bars
- applesauce pouches

FIRST AID KIT

First aid kits are an essential for hiking. Always be prepared for an emergency.

What you may need:

- band aids
- cold compress
- gauze
- tweezers
- antibiotic ointment
- antiseptic pads

GAMES YOU CAN PLAY

SCAVENGER HUNT

Take a photo of the following items

- sign posts
- foot prints
- the route on a map
- a water droplet
- a wild animal
- bird footprints
- a bridge
- a flower
- a pattern in nature
- a multi-colored plant
- someone jumping in the air
- an unusual gate
- a rainbow
- an animal shaped cloud
- an insect

GEOCACHING

Geocaching is finding containers that are camouflaged to blend into their surroundings. Inside, there's a log book to sign and possible trinkets.

Download a geocaching app. It will tell you locations of caches.

When you find caches, replace trinkets with something else.

Make sure to bring a pen so you can sign log books and keep track of what you find!

PRESS FLOWERS

Make flowers and leaves last a long time!

All you need is a thick book. Pick a flower or leaf and place between the pages of the book. Close the book, and keep the flower or leaf there for one day. When you open up the book again, you'll have a dry flower that will look like it did before you pressed it!

Make sure that you are able to pick the flowers or leaves. Some forests are protected!
