

## **PRIORITIZE YOUR HEALTH WALK-IN MAMMOGRAMS NOW AVAILABLE AT SCHNECK**

You're always looking out for others—caring for your family, helping friends, supporting your community. But when it comes to your own health, it's just as important to take a moment and care for you.

**Breast cancer is the second most common cancer among women in the United States.** Statistics show that one in eight women will be diagnosed with breast cancer in her lifetime. The good news? **Early detection saves lives.** That's why annual screening mammograms are recommended for women age 40 and older.

### **Why Mammograms Matter**

Mammograms can detect breast cancer early—often before symptoms appear—greatly improving the chances of successful treatment. Early detection saves lives and can reduce the need for more aggressive treatments later on.

### **Schneck Makes It Easy**

At Schneck, we're committed to making preventive care as accessible and convenient as possible. That's why we now offer **walk-in screening mammograms Monday through Friday, from 7:30 to 11:30 a.m.** No appointment is needed, and most screenings are covered by insurance.

We use the latest **3D Mammography technology** which provides a more detailed view of breast tissue—allowing for earlier detection and fewer false alarms.

### **Important to Know**

To receive a mammogram at Schneck, **patients must have a primary care provider.** This ensures any follow-up care, if needed, is coordinated quickly and effectively. If you do not currently have a primary care provider, our team can help you get connected with one before your screening.

### **Fast, Convenient, and Life-Saving**

- o No appointment or referral needed
- o Walk in Monday–Friday, 7:30 to 11:30 a.m.
- o Screening takes just 20 minutes
